Sub: Request for conduct FDP program

Respected Sir

I V.Jhansi Lakshmi, HOD, Department of Information Technology Malineni Lakshmaiah Women's Engineering College, would like to put forward proposal to conduct FDP on Cloud Computing With AWS our college 19-11-18.

Thanking You Sir

Yours Sincerely

(V.Jhansi Lakshmi)

About College

Malineni Lakshmaiah Women's Engineering College is established in the year 2008. It is a self-financing institution which owes its foundation to the bold and inspired vision of Malineni Perumallu Educational Society, Singarayakonda. The institution is ideally located in a vast expanse of 5.08 acres of land on the outskirts of GUNTUR city at a distance of about 6 Kms from the city center.

The departmental buildings are located in close proximity each other with wide open spaces all around. The playfields and other student and staff amenities are within working distances. College is offering U.G and P.G Programs in different specializations. Three U.G programs are B.Tech (CSE) with intake of 120, B.Tech (IT) with intake of 60 and B.Tech (ECE) with intake of 120. Two P.G programs are M.Tech (CSE) with intake of 20 and M.Tech(VLSI) with intake of 20.

About Department

The Department of Information Technology at the "Malineni Lakshmaiah Women's Engineering College" was formed in the year 2008 and provides an outstanding research environment complemented by excellence in teaching. The Department offers B.Tech degree. The Department has a comprehensive curriculum on topics related to all aspects of Computer Hardware and Software with an emphasis on practical learning. The

course structure is up-to-date and includes courses on nascent topics to equip our students with the latest developments in Information Technology. The Department has state-of-the-art infrastructure and computing equipment supported by high speed Ethernet and wireless networks. Our faculty members aim at delivering top class education blending their rich research experience with classroom teaching.

Objective of the Programme

The proposed FDP introduces fundamental concepts Cloud Computing With Aws Cloud computing is the on-demand delivery of compute power, database, storage, applications, and other IT resources through a cloud services platform via the Internet with pay-as-you-go pricing. Whether you are running applications that share photos to millions of mobile users or you're supporting the critical operations of your business, a cloud services platform provides rapid access to flexible and low-cost IT resources. With cloud computing, you don't need to make large upfront investments in hardware and spend a lot of time on the heavy lifting of managing that hardware. Instead, you can provision exactly the right type and size of computing resources you need to power your newest bright idea or operate your IT department. You can access as many resources as you need, almost instantly, and only pay for what you use.

Cloud computing provides a simple way to access servers, storage, databases and a broad set of application services over the Internet. A cloud services platform such as Amazon Web Services owns and maintains the network-connected hardware required for these application services, while you provision and use what you need via a web application.

Vision

To emerge as center of excellence in IT education, research and innovation by promoting competent and woman engineers with ethical values for development of the society.

Mission

IM1: Bringing innovative approach in teaching-learning process competent Information Technology engineers.

IM2 To inculcate ethical and social values among the students for improving their life skills.

IM3: To promote research and development in the domain of Information Technology to meet the emerging needs of the Society.

IM4: To promote higher education, technological innovation and entrepreneurship in the areas of IT with interdisciplinary connection.
